ACCOUNTING 9706/42
Paper 4 Problem Solving (Supplementary Topics)  
October/November 2015  
2 hours

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

An answer booklet is provided inside this question paper. You should follow the instructions on the front cover of the answer booklet. If you need additional answer paper ask the invigilator for a continuation booklet.

Answer all questions.
All accounting statements are to be presented in good style.
International accounting terms and formats should be used as appropriate.
Workings should be shown.
You may use a calculator.

The number of marks is given in brackets [ ] at the end of each question or part question.

This document consists of 6 printed pages, 2 blank pages and 1 insert.
1 A junior in the accounts department of Makewell plc produced the following draft financial statements for the year ended 31 December 2014. These contained errors and omissions.

Makewell plc
Manufacturing account for the year ended 31 December 2014

<td>(20 000)</td>
</tr>
</tbody>
</table>

Additional information

1 Finished goods have been transferred from the factory to the warehouse at cost plus 25% for some years.

2 Non-current assets at 1 January 2014 had the following values.

<table>
<thead>
<tr>
<th></th>
<th>Cost</th>
<th>Provision for depreciation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Property</td>
<td>600 000</td>
<td>24 000</td>
</tr>
<tr>
<td>Factory and office equipment</td>
<td>310 000</td>
<td>86 000</td>
</tr>
</tbody>
</table>

The value of the property included $200 000 for the land. Property is depreciated at 2% per annum on the straight-line basis. Of the property depreciation, 3/4 relates to the factory and 1/4 to the offices.

Equipment is depreciated at 10% per annum, on cost, and charged on a monthly basis.

On 1 January 2014 factory equipment had a cost of $250 000.
On 1 April 2014 new factory equipment was bought at a cost of $80 000.
On 1 July 2014 office equipment with an original cost of $20 000 was sold.

No depreciation had been provided in the draft financial statements.
3 Distribution costs included $3000 for carriage inwards.

4 Work in progress at 1 January 2014 was valued at $65 000 and on 31 December 2014 at $85 000.

REQUIRED

(a) Prepare for the year ended 31 December 2014:

(i) A corrected manufacturing account [8]

(ii) A corrected income statement. [9]

Additional information

1 On 1 January 2014 ordinary share capital of $1 shares was $500 000. On 26 March 2014 a bonus issue was made of 2 ordinary shares for every 5 ordinary shares held. On 1 November 2014 the directors issued 100 000 more ordinary shares at a price of $1.20 each.

2 On 1 January 2014 the balance on the retained earnings account was $380 000. No dividend was paid during the year.

3 On 31 December 2014 other balances were as follows.

<table>
<thead>
<tr>
<th></th>
<th>$</th>
</tr>
</thead>
<tbody>
<tr>
<td>Goodwill</td>
<td>35 000</td>
</tr>
<tr>
<td>Trade receivables</td>
<td>126 000</td>
</tr>
<tr>
<td>Cash and cash equivalents</td>
<td>88 000</td>
</tr>
<tr>
<td>Trade payables</td>
<td>98 000</td>
</tr>
<tr>
<td>Other payables</td>
<td>26 000</td>
</tr>
</tbody>
</table>

4 On 19 January 2015 a fire in the warehouse destroyed finished goods which cost $17 000.

REQUIRED

(b) Prepare the statement of financial position at 31 December 2014 in accordance with IAS1. [23]

[Total: 40]
Jamal is a sole trader. He is concerned that during the next few months he may have insufficient cash to pay his expenses.

He provides the following information.

1. Sales revenue

   Actual sales per month

   2015
   
   September 135
   October 187

   Budgeted sales per month

   2015
   
   November 209
   December 225

   2016
   
   January 258
   February 293

2. 20% of the sales are for cash.

3. 80% of the sales are on credit. 60% of the credit customers pay in the month following the sale. The balance is received two months after the sale.

4. Jamal purchases goods one month before their sale. He marks up his goods at a uniform rate of 50%. He pays for 75% of these goods in the month following purchase. The balance is paid two months after purchase.

5. Administration expenses are 10% of sales revenue and will be paid in the month following the sale.

6. Wages of $18 000 will be paid each month.

7. A delivery van costing $20 000 will be purchased in November 2015 and paid for in full by cheque.

8. Equipment which originally cost $25 000 will be sold on 1 December 2015 for $10 000. Payment will be received, half at the time of sale and half one month later.

9. Equipment costing $30 000 will be purchased in November 2015. A deposit of 30% will be paid on delivery. Equal monthly payments of 10% of the balance remaining will then be paid. (Ignore any interest)

11. A bank loan, $25 000, taken out in 2011 will be repaid in full in January 2016.

12. The balance on the business bank account at 1 November 2015 is expected to be $18 000 debit.
**REQUIRED**

(a) Prepare a monthly cash budget for each of the three months from November 2015 to January 2016. Show all workings and work to the nearest thousand dollars. [30]

**Additional information**

Jamal prepared his own financial statements for the year ended 31 August 2015. After the financial statements were prepared his accountant made the following discoveries.

1 An impairment review of three delivery vans was as follows:

<table>
<thead>
<tr>
<th>Van</th>
<th>Carrying amount</th>
<th>Net selling price</th>
<th>Value in use</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>$16,000</td>
<td>$15,000</td>
<td>$17,000</td>
</tr>
<tr>
<td>2</td>
<td>$18,000</td>
<td>$14,000</td>
<td>$16,000</td>
</tr>
<tr>
<td>3</td>
<td>$24,000</td>
<td>$20,000</td>
<td>$16,750</td>
</tr>
</tbody>
</table>

Jamal entered the carrying amount in his statement of financial position.

2 When preparing his income statement Jamal treated the opening inventory of $6000 as closing inventory and closing inventory of $4000 as opening inventory.

Jamal's income statement for the year ended 31 August 2015 showed a draft profit for the year of $40,000.

**REQUIRED**

(b) Calculate the revised profit for the year. [5]

**Additional information**

Jamal calculated his return on capital employed for the year ended 31 August 2015 as 40%. He did this by dividing his profit for the year of $40,000 by the closing balance on his capital account.

**REQUIRED**

(c) Calculate to one decimal place Jamal's revised return on capital employed after the adjustments. [5]

[Total: 40]
3 Peter Parfitt produces a single product and operates a standard costing system.

REQUIRED

(a) Explain what is meant by a standard costing system. [4]

Additional information

The standard selling price per unit is $52.

Budgeted monthly production and sales for October were 800 units.

The standard costs per unit were as follows:

- Direct materials 2 kilos at $7 per kilo
- Direct labour 3.5 hours at $6 per hour
- Overheads 2 hours at $4.50 per hour

The actual results for October were as follows:

- Inventory No opening or closing inventory
- Sales 815 units at $51 each
- Direct materials used 1580 kilos
- Direct material cost $12,000
- Direct labour hours 2900
- Direct labour cost $18,100
- Overheads $200 greater than standard

REQUIRED

(b) Prepare the income statement for Peter Parfitt for the month of October. [3]

(c) Calculate the following variances for October clearly identifying which variance you have calculated.

(i) Sales price
(ii) Sales volume
(iii) Total sales
(iv) Material price
(v) Material usage
(vi) Total material
(vii) Labour rate
(viii) Labour efficiency
(ix) Total labour [18]

(d) Calculate the total budgeted gross profit for October. [3]

(e) Prepare a statement reconciling the total budgeted gross profit with the actual profit. [8]

(f) Describe how standard costing would be useful to Peter Parfitt. [4]

[Total: 40]
