Great care should be taken to ensure that any confidential information given does not reach the candidates either directly or indirectly.

No access to the Question Paper is permitted in advance of the examination.

If you have any problems or queries regarding these Instructions, please contact CIE by e-mail: international@cie.org.uk,
by phone: +44 1223 553554,
by fax: +44 1223 553558,
stating the Centre number, the nature of the query and the syllabus number quoted above.
Preparing apparatus

These instructions detail the apparatus required for the experiments in the Question Paper. It is essential that absolute confidentiality is maintained in advance of the examination: the contents of these instructions must not be revealed either directly or indirectly to candidates.

No access is permitted to the Question Paper in advance of the examination.

If you have problems or queries regarding these instructions, please contact CIE:
  by e-mail: international@cie.org.uk,
  or by telephone: +44 1223 553554,
  or by fax: +44 1223 553558,
stating the nature of the query and quoting the syllabus and paper numbers (9702/31).

It is assumed that the ordinary apparatus of a Physics laboratory will be available.

Number of sets of apparatus

The number of sets of apparatus provided for each experiment should be \( \frac{1}{2}N \), where \( N \) is the number of candidates taking the examination. There should, in addition, be a few spare sets of apparatus available in case problems arise during the examination.

Organisation of the examination

Candidates should be allowed access to the apparatus for each experiment for one hour only. After spending one hour on one experiment, candidates should change over to the other experiment. The order in which a candidate attempts the two experiments is immaterial.

Assistance to Candidates

Candidates should be informed that, if they find themselves in real difficulty, they may ask the Supervisor for practical assistance, but that the extent of this assistance will be reported to the Examiner, who may make a deduction of marks.

Assistance should only be given:
  when it is asked for by a candidate,
  or as directed in the Notes sections of these instructions,
  or where apparatus is seen to have developed a fault.

Assistance should be restricted to enabling candidates to make observations and measurements. Observations and measurements must not be made for candidates, and no help should be given with data analysis or evaluation.

All assistance given to candidates must be reported on the Supervisor's Report Form.

Faulty apparatus

In cases of faulty apparatus (not arising from a candidate's mishandling) that prevent the required measurements being taken, the Supervisor may allow extra time to give the candidate a fair opportunity to perform the experiment as if the fault had not been present. The candidate should use a spare copy of the Question Paper when the fault has been rectified or when working with a second set of apparatus.

Supervisor's Report

The Supervisor should complete the Supervisor's Report Form on pages 7 and 8 and enclose it in the envelope containing the answers of the candidates. If more than one envelope is used, a copy of the report must be enclosed in each envelope.
Question 1

Apparatus requirements (per set of apparatus unless otherwise specified)

Two metre rules, each with a millimetre scale.

50 g mass. See Note 1.

100 g mass hanger.

Stand, boss and clamp.

Protractor.

Two 30 cm lengths of string, each tied into a loop.

Small supply of Blu-Tack.

Notes

1 The 50 g mass should be attached to the 100 cm end of one of the metre rules using adhesive tape, as shown in Fig. 1.1.

![50 g mass](fig1.png)

**Fig. 1.1**

2 If the apparatus is to be used by another candidate then it should be restored to its original state.

Information required by Examiners

Sample set of numerical results, clearly labelled “Supervisor’s Results” and obtained out of sight of the candidates.
Question 2

Apparatus requirements (per set of apparatus unless otherwise specified)

Two strips of thin card of approximate length 28 cm, width 2 cm and approximate thickness 0.2 mm. See Note 1.

Six paper clips each with approximate mass 0.4 g.

Stand, boss and clamp.

Optics pin.

Cork.

30 cm ruler with a millimetre scale.

Stopwatch reading to 0.1 s or better.

Access to a roll of adhesive tape. The tape should be of maximum width 2 cm.

Scissors.

Access to a micrometer screw gauge.

Notes

1. Candidates may ask for extra strips of card, and these should be provided on request.

2. If the apparatus is to be used by another candidate then it should be restored to its original state with each candidate being provided with two new strips of card.

Information required by Examiners

Sample set of numerical results, clearly labelled “Supervisor’s Results” and obtained out of sight of the candidates.
This form should be completed and sent to the Examiner with the scripts.

SUPERVISOR’S REPORT FORM

General Certificate of Education Advanced Subsidiary Level and Advanced Level

October/November Session 2011

The Supervisor's Report should give full details of:

(a) any help given to a candidate (including the nature of the help given and the name and candidate number of the candidate);

(b) any cases of faulty apparatus (including the nature of the problem, the action taken to rectify it, any additional time allowed, and the name and candidate number of the candidate);

(c) any accidents that occurred during the examination;

(d) any other difficulties experienced by candidates, or any other information that is likely to assist the Examiner, especially if this information cannot be discovered in the scripts.

Cases of individual hardship, such as illness, bereavement or disability, should be reported direct to CIE on the normal Special Consideration form.

Information required by Examiners

For each question, please enclose a sample set of numerical results, obtained out of sight of the candidates and clearly labelled “Supervisor's Results”.
